ANH DANG

anhtdang92@gmail.com | Houston, TX
LinkedIn | GitHub | Portfolio | Secret Clearance (DoD)

TECHNICAL SKILLS

Languages: SQL (T-SQL, Stored Procedures, Query Optimization), Python (Pandas, NumPy, Matplotlib)
Tools: Power BI, Tableau, MS SQL Server, Azure Data Studio, Azure ML, Azure DevOps, Git, Jupyter
ML / AI: LLM/GenAI, Quantized Models

EXPERIENCE

First Community Credit Union — Houston, TX
$2.9B assets | 176K members | 41 Texas counties | 19 branches

Data Analyst II — Apr 2026 – Present
- Sole data analyst embedded on the digital banking Scrum team, supporting sprint delivery and data requirements for member-facing digital products.
- Built an automated daily pipeline delivering cardholder risk data to the card processor, replacing a manual process.
- Led analytics support for an ML-powered credit decisioning platform. Handled data preparation, validation, and performance monitoring.

Data Analyst I — Apr 2023 – Apr 2026
- Engineered cross-database record matching using staging table architecture, eliminating linked server bottlenecks that consumed 90%+ of query execution time.
- Built Python statistical analyses (Pandas, Matplotlib) to refine retail transaction limits, directly informing risk policy for consumer user groups.
- Created executive-facing Power BI dashboards on lending, delinquency, and member growth trends for senior leadership.

IT Data Analyst — Aug 2021 – Apr 2023
- Administered MS SQL Server databases and developed stored procedures automating reporting workflows across 19 branches.

Marketing Data Analyst Intern — Jun – Aug 2021
- Built Python/Pandas data pipelines and Tableau dashboards for customer segmentation and targeted marketing campaigns.

PROJECTS

atlas-ml-trading AI-powered stock trading dashboard with LSTM neural networks, 34 technical indicators, 7-architecture ablation study, walk-forward backtesting, and FastAPI serving with Alpaca integration.

argus Open-source cyber threat detection platform. GNN-based lateral movement detection, hybrid anomaly detection (LSTM-AE + IsoForest + XGBoost), NLP threat intelligence, Neo4j, PyTorch.

signal-network-mapper Interactive web app for planning military signal support networks: drag-and-drop network diagrams with MIL-STD-2525 symbols (React, ReactFlow).

deepseek-local-inference Local LLM benchmarking of distilled DeepSeek-R1 models on an RTX 4090 with Hugging Face Transformers (reasoning, math, and coding prompts).

MILITARY

U.S. Army Reserve — Houston, TX

S6 OIC, Signal Officer (1LT) — May 2025 – Present
- Lead unit communications, IT operations, and network planning, and account for all signal equipment.

Signal Officer (2LT) — Jul 2022 – May 2025
- Supported a 60+ Soldier unit. OIC for live-fire range operations with zero safety incidents.

EDUCATION

M.S. Computer Science, Machine Learning | Georgia Institute of Technology (OMSCS) | Expected Summer 2027
Data & Visual Analytics | *ML for Trading* | *Knowledge-Based AI* | *Network Science* | *AI Ethics & Society* | *Computer Graphics in the AI Era*
B.S. Computer Science | University of Houston-Downtown

CompTIA Security+ (SY0-701) | Certified Sep 2026

Secret Clearance (DoD), U.S. Army Reserve | English (native), Vietnamese (conversational)
